AtrapaFly™ offers the ultimate fly control solution for residential and public facing areas. Its slimline design ensures complete discretion in fly control. Available as a plug in the wall unit or as a table top wired unit.

AtrapaFly™ has been designed for areas that require discreet and unobstructive fly control without compromising on performance. Its energy efficient 9W lamp ensures maximum flying insect attraction, as well as low energy consumption.

AtrapaFly™'s Translucent Technology™ cover allows for the widest coverage of UVA, creating a maximum window of attraction for flies allowing them to be caught quickly on the glue board.

Engineered with ease of service in mind, the replacement of the glue board and lamp in AtrapaFly™ is quick and easy. The glue board can be removed by simply pulling out from the aperture. The new glue board can then be slid in through the glue board retainers.

The lamp is also simple to replace – after ensuring the power is off, remove the cover of the unit by simply pulling it towards you. The lamp can then be screwed out from its holder. Reversing this action locks the new lamp securely in place. The unit can be serviced with both hands free and without the use of any tools.

Features and Benefits

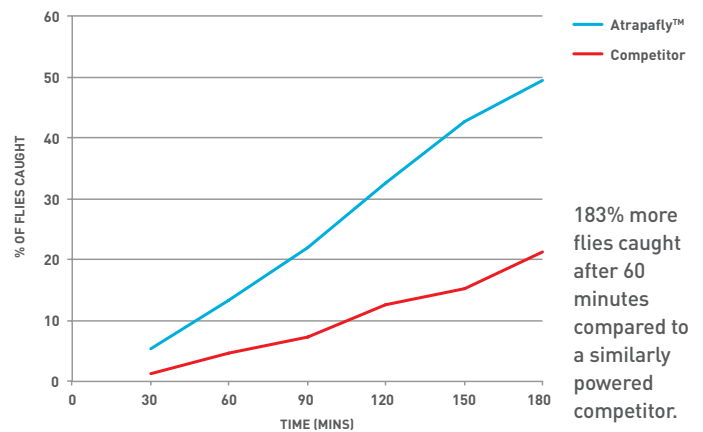

- Patented Translucent Technology™ for greater fly catch
- Plug in the wall or table top options available
- Twist plug design for correct orientation in vertical or horizontal wall sockets
- Easy replacement of glue board and lamp
- Large, fully grid-marked glue board for maximum catch area and HACCP compliance
- Energy efficient 9 W lamp
- Ideal for domestic or commercial use
- Safe to use around children and pets

Simple Replacement of Consumables

- Removeable clip-off front screen
- Simple screw-fit lamps
- Easy glue board replacement

Superior Fly Catch Performance
