## APPLICATIONS

Supermarkets

Deli areas

Food preparation areas

Food Courts

QSRs

Food processing

The Genus Delta™ offers complete flexibility in placement with its suspended or wall mountable siting. Its 2 x 15 W lamps and reflector panels offer reduced energy consumption and increased attraction levels to remove flying insects quickly.

The Genus Delta™ has been designed for areas that require high levels of flying insect control as well as complete flexibility of placement. The Genus Delta™ can either be suspended or wall mounted, meaning that it can be sited throughout the premises without the necessity of having different types of units. Its built in reflector panels ensure minimum loss of UVA output from its 2 x 15 W bulbs, ensuring maximum flying insect attraction as well as reduced energy consumption.

The Genus Delta™'s maximum control board visibility with its open and unobstructed design means that flies can head straight onto the Brandenburg universal glue board with ease.

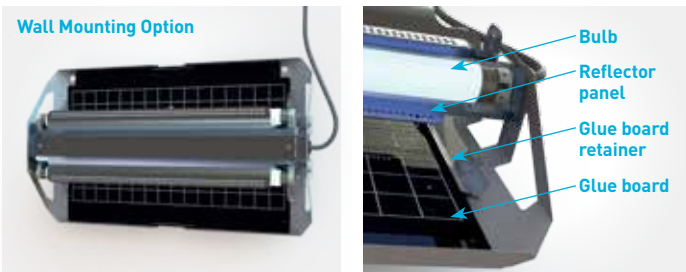

Engineered with ease of service in mind, the replacement of the control board and bulbs in the Genus Delta™ unit is quick and easy to do. Cut out edges allow the control board to be removed by simply pushing it up from the unit's edge. The new control board can then be dropped in or slid through the retainers (if fitted). Bulbs are also simple to replace – our quick release system enables bulbs to be removed from their holders with a twist and pull. Reversing this action locks the new bulbs securely in place. The unit can be serviced with both hands free and without the use of any tools.

The Genus Delta™ is the first choice for flexibility of placement, cost saving and ease of servicing.

### Features and Benefits

- Can be suspended or wall mounted for flexibility in placement
- Open and unobstructed design to offer efficient fly catch
- Unique design allows quick and easy replacement of control board
- 2 x 15 W UVA lamps and reflector panels for powerful, effective coverage in every space
- Large, fully grid-marked glue board for maximum catch area and HACCP compliance
- Available in a stainless steel or white finish
- Optional sleeved lamps for glass free areas

Wall Mounting Option
