## APPLICATIONS

- Restaurants
- Food Production
- Commercial Kitchens
- Supermarkets
- Quick Service Restaurants
- Food Processing

**Genus® Futura combines exceptional fly catch with ease of service to offer the next generation back of house flying insect control unit. Its 2 x 15 W lamps and electronic ballast operation offer reduced energy consumption and increased attraction levels to remove flying insects quickly from food safety critical areas.**

Genus® Futura has been designed and engineered specifically to provide fast flying insect catch for for back of house areas. This fast reduction of flying insects from sensitive food environments reduces the risk of foodborne pathogens carried by flying insects, helping to increase overall food safety for your premises.

Genus® Futura is a discreet and silent unit that uses 2 x 15w lamps. Its large fully grid marked glue board provides maximum catch area whilst complying with HACCP guidelines and its electronic ballast engineering means reduced running costs and fewer replacement parts.

The Genus® Futura can be mounted either vertically, horizontally or corner mounted, allowing the flexibility of placement in a location of any size and style.

Designed and engineered with ease of service in mind, the replacement of the glue board and lamps in the Genus® Futura is quick and easy to do. The unit's hinged magnetic catch door gives access to the glue board and the lamps, allowing quick and easy servicing of the unit with both hands free and without the use of any tools.
